### DETAILED ACTION

1. The drawing corrections filed 12/08/2003 are acceptable.
2. Claims Directed to an Apparatus must be distinguished from the prior art in terms of structure rather than function, *In re Danly* 263 F.2d 844, 847, 120 USPQ 582, 531 (CCPA 1959).

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. *Ex parte Masham*, 2 USPQ2d 1657 (bd Pat. App. & Inter. 1987). Thus the structural limitations of claim 28, including a processor, memory, display and computer network are disclosed in Ogasawara (6,123,259) as described herein. Also as described the limitations of the claim do not distinguish the claimed apparatus from the prior art.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 28-35, 49-55 are rejected under 35 U.S.C. 102(e) as being anticipated by Bouve et al (4,682,525) or Ogasawara (6,123,259).

Art Unit: 3629

As per Claims 28-35, 49-55.

Bouve et al ('525) discloses a processor, a memory, display, see figure 1 (122), and computer network (124, 12e).

The functional language of the claims has been given no weight for patentability determination, as indicated above, no structural differences are seen between the claimed apparatus and the Bouve et al ('525) apparatus.

As per Claims 28-35, 49-55.

Ogasawara ('529) discloses a processor, see figure 1 (20), a memory, (30), display, (10), and computer network (40, 50) to provide communication between a user device and a retailer's server.

The functional language of the claims has been given no weight for patentability determination, as indicated above, no structural differences are seen between the claimed apparatus and the Ogasawara ('529) apparatus.

***Allowable Subject Matter***

4. Claims 20-27, 36-48, 56-72 are allowable.

5. The following is an examiner's statement of reasons for allowance:

As per Claims 20, 36, 42, 56, 61, 67 and 70.

The prior art of record, Bouve et al (5,682,525) in view of Ogasawara (6,123,259) do not disclose receiving from a retailer-based agent in response to the query the customized offer for sale of an item of merchandise that is offered for sale from a retailer proximate the user, the item of merchandise that offered for sale being associated with the item of merchandise that the user desires to purchase.

The claims that depend from the above allowable claims are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
